

***WIKIARQUITECTURA  
STUDENT AWARDS  
2017***

***JURY MINUTES***

## **LETTER FROM THE JURY**

When we launched the WAS awards we didn't set any goals or expectations, but if we had we could have never imagined that so many students from so many different schools would take the time to participate and submit their projects, and for that we are deeply grateful to all participants. This event was all about the student and you've made it an incredible success!

Judging the work of other is never easy. One must understand the different scenarios and realities that different people might live in and try to understand how they reached the conclusions they did and what influenced them to get to the point to where they did and design those specific projects.

As jurors of the WAS awards 2017 the WikiArquitectura team tried to be sensitive to these variables and spent all the time that we needed to fully understand each project in a process that took weeks to complete until we finally chose the projects that have been announced as winners.

We understand that not everyone will be happy with these results and we encourage everyone to voice their opinion, but we want to assure you that each project was reviewed with the greatest care and respect for the work done.

## **PARTICIPATION DETAILS**

Total projects submitted: 308

Housing projects submitted: 78

Residential projects submitted: 58

Facilities projects submitted: 147

Disqualified projects: 25
